

Ex-Works Collection Information

All consignments should be collected **within 1 month** of being notified by our logistics department of readiness. We reserve the right to charge demurrage if consignments are not collected within this time frame.

When collecting a consignment of cylinders based on the EXW Incoterms 2020®, certain methods of transport will not be acceptable.

Please ensure that your forwarder is aware that the items are **CLASS 2.1 DANGEROUS GOODS** and cannot be loaded on to the following:

- Passenger ferries
- Passenger aircrafts

The goods are also forbidden from travelling through **TUNNELS**.

Any forwarders must carry an **ADR license** and/or have **orange plates** on their vehicle (depending on the mass of the consignment).

Please pass the following information to the forwarder so that they can organise the correct transport (this will be applicable for most consignments):

- UN1954, Compressed Gas, Flammable, N.O.S., (ethane, methane mixture)
Class 2.1, ADR Code 1F, Transport Category

Please see the below photos with some examples of how cylinders will be packed for transport.

If you have any questions about the requirements for collecting an ex-works shipment, please email logistics@effectech.co.uk for support.
