

EffecTech vacancy – Gas Quality Engineer

EffecTech is looking for talented and enthusiastic individuals to join our Site Services, delivering inspection and calibration services at our clients' sites.

The Role

The Gas Quality Engineers attend customers' sites to undertake inspections of the gas quality measurement system and validations/calibrations of the gas chromatographs and other gas quality instrumentation.

This role involves extensive travel, primarily within the UK, but also overseas. Once fully trained, the engineer's time will split between customer site visits and office-based work including data analysis and report generation.

The successful applicant will receive full training in all technical methods and skills required.

The ideal candidate

Applicants should have:

- a degree qualification in a science discipline, or at least three years' experience in a related technical field
- excellent communication skills, both verbal and written
- sound organisational ability with the capacity to work individually or within the team on many tasks concurrently
- a good eye for detail
- a full, clean driving licence

Salary range and benefits

Salary range will be between £19,000-£25,000 per annum, dependent on skills and experience. In addition, the successful candidate will receive an off-shore and overseas allowance and will be enrolled in the company bonus and pension schemes.

How to apply

Please send a CV and covering letter to careers@effectech.co.uk

Company profile

EffecTech is the global leader in gas measurement, providing accredited inspection, calibration and testing services to the energy and power industries for gas quality, flow and total energy metering.

Our products are used to ensure customers make gas quality measurements accurately. This is a niche and vital service required globally.

Key applications include:

- Fiscal measurement for custody transfer and pricing of natural gas / LNG / bio-methane
- Process control and emissions trading measurements in manufacturing
- Continuous emissions monitoring measurements in environmental stack testing

Customers include Shell, BP, National Grid Gas, and E.ON worldwide.

EffecTech underpins the quality of its services through its four UKAS accreditations:

- ISO 17025 for Calibration
- ISO 17020 for Inspection
- ISO 17043 for Proficiency Testing
- ISO 17025 for Testing

We strive for excellence in everything we do. EffecTech has provided a stable, safe and enjoyable place to work for more than 20 years, employing people from both the local area and further afield, and developing them into world-leading scientists and engineers. Continual staff development is central to company culture and we regard it as vital for long-term business success.

EffecTech provides an environment where people who are open-minded, like to think for themselves and value quality as much as we do, are able to thrive and develop their professional and technical skills in the company of like-minded people.

Uttoxeter

We are based in the attractive Staffordshire market town of Uttoxeter, on the edge of the Peak District. Uttoxeter has excellent transport links to the A50, M6 and M1 with both Stoke-on-Trent and Derby within 30 minutes' drive.

Candidate Privacy Policy

EffecTech takes the privacy rights of recruitment candidates seriously. On our website you will find information on what personal data EffecTech collects, why we collect it, what we do with it and for how long it will usually be retained, as well as what rights you have over your data and how you can exercise them.

If you have any questions about this policy or your data, please write to:
