EffecTech® calibration gases greatly reduce the uncertainty of the gas measurements you make whether it be underpinning your fiscal, contractual or environmental obligations.

EffecTech® offers performance evaluations of analytical instrumentation and inspection of gas quality measurement systems to help customers maintain confidence in analytical measurements used to calculate physical properties.

EffecTech's proficiency testing schemes provide objective evidence of analytical performance for both laboratory and process methods and attract participants from all over the world.

- Global Gas and LNG (GGLNG) for the natural gas and LNG industry
- Stack Emissions (SEPTS) for companies that provide stack testing services.

Working with EffecTech guarantees you the highest quality service from your first enquiry to the final delivery
