

**EffecTech**

Global Leaders in Gas Measurement

## Environment Policy

*EffecTech* will observe and comply with all relevant Environment Regulations, Legislation and approved Codes of Practice as amended from time to time and will ensure personnel observe and comply with the said regulations.

### *EffecTech* will

- assess the environmental effects of its proposed activities and take appropriate measures.
- observe and comply with all relevant statutory obligations and codes of practice regarding environment.
- ensure that personnel are familiar with all local environmental policies applicable at the site where the work is to be carried out and that personnel comply with same.
- require that all personnel are aware of and carry out their own obligations with regard to the environment.
- co-operate fully with relevant enforcement agencies and non-statutory bodies and ensure personnel obey and comply with any instructions or orders given to them by the client/site representatives in all matters relating to the environment.
- require contractors who work for the company to accept the same standards of care for the environment as the company itself.
- everyone is encouraged to put forward suggestions and ideas for improvement of environmental policy and its management and *EffecTech* fosters an understanding of environment relating to its business.
- co-operate fully to achieve the highest possible standards in the environment.
